DR

Secure DRaaS
with Veeam

Offsite, online, or just in case.

The loss of data for your business has increased more than 400 percent in just the past two years. It is also true that business data loss through unanticipated disasters, both natural and man-made, is accelerating. Unfortunately, businesses of any size incorrectly assume that their company is not at risk, and that is potentially a big problem.

An increasing number of forward-thinking business are turning to a scalable and flexible cloud solution to better manage to the possibility of a disaster and that solution is Disaster Recovery as a Service (DRaaS). iland has partnered with Veeam to offer iland Secure DRaaS, a secure and compliant cloud backup and replication service delivered at scale globally.

It does more. It costs less. It's that simple.

iland's Secure DraaS with Veeam integrates your on-premises Veeam environment with an extension to iland's Secure Cloud infrastructure, providing secure and powerfully built replication and failover capabilities. All of this combined with straightforward and cost-effective pricing.

Intuitive Cloud management

The success of your cloud is reliant on the ease of managing all the necessary components. Easily manage all of your virtual data center resources, view detailed performance information, create and restore from backups, replicate data, access granular billing information, and more, with our iland secure cloud console.

Disaster management is our goal.

iland's global cloud platform provides the automation and orchestration necessary to protect your critical business workloads with the peace of mind that comes from our ability to meet your resiliency goals, from design through to implementation. This ,combined with our focus on security, compliance, flexibility, and reporting, has established iland as the cloud platform of choice for resilient businesses.
